

University of St.Gallen

Center for Aviation and Space Competence

CAS in Aviation Accountability, Safety and Compliance Management (CAS-ASCM)

Upgrade your career!

The CAS-ASCM develops high-potential aviation managers into leaders of tomorrow by combining their aviation experience with management competence and vice-versa. Capacities are built with respect to challenges in accountable management, internal auditing, safety & security management, and cross-cultural management. Completing this program will enable the participants to influence and steer their company by applying their knowledge of the global aviation system. Successful completion of the CAS-ASCM earns 10 ECTS credits, which may be used and accounted for further study programs like the DAS-GATM at the University of St. Gallen.

Dr. Andreas Wittmer, Managing Director of the Center for Aviation and Space Competence at University of St. Gallen

"The aviation industry is seeking talent. Since it is a special industry, the need for talents who bring both, management knowledge and aviation know-how is key. By educating specifically for the industry, we help aviation companies develop faster and stronger".

Accountability, Safety and Compliance Management
